

Manual Installation Instructions for CustomTimeAxis™

Now that you have unzipped the CustomTimeAxis™ file and chosen to forgo utilizing the automatic setup installer, you may manually perform the installation of all CTA files by doing the following:

Since you have already unzipped the CustomTimeAxis archive directory (since you are reading this right now, in the same folder you've found this Installation Manual you should also then see the following contents:

Quad Profile (folder)
Templates (folder)
CTA Authorization Instructions.txt
CTA Manual V 3 2017n.pdf
CustomTimeAxis.dll
CustomTimeAxis.ex4
showmycid.ex4

- 1) If you know your way around your computer pretty comfortably, then you may simply place each of the above items in the following directories as per the file paths below:

CustomTimeAxis.ex4

place in **computer/Local Disk C/Program Files/(x86)/your broker Metatrader/mql4/Indicators**

CustomTimeAxis.dll

place in **computer/Local Disk C/Program Files/(x86)/your broker Metatrader/mql4/Libraries**

Entire **Quad Profile** folder

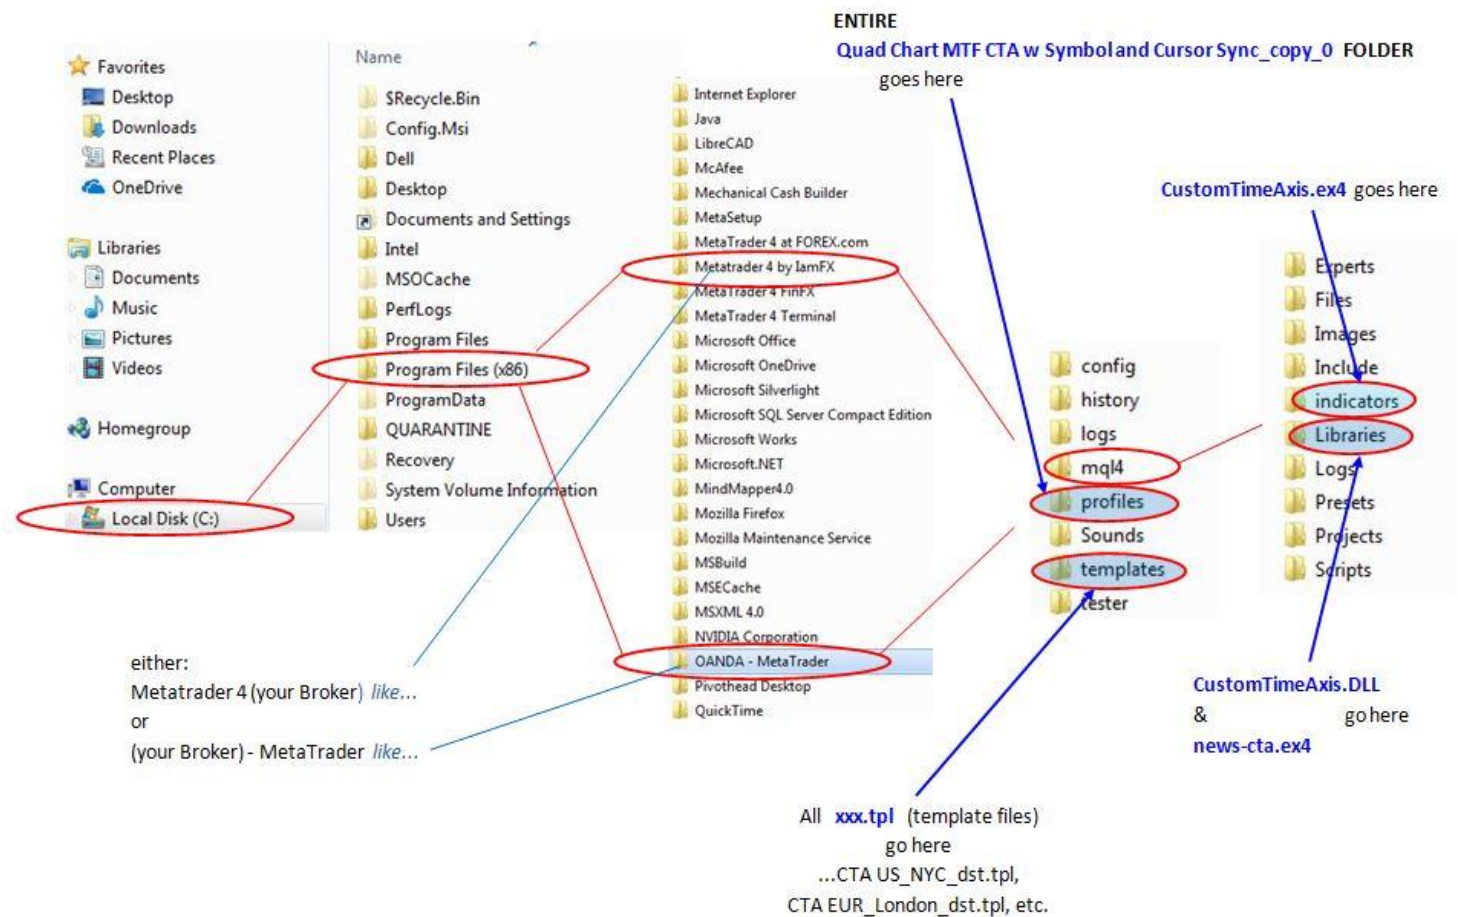

place in **computer/Local Disk C/Program Files/(x86)/your broker Metatrader/Profiles**

All **8 .tpl files** in the Templates folder

place in **computer/Local Disk C/Program Files/(x86)/your broker Metatrader/Templates**

See diagram below to help with visual representation of the above.

Go to Start/Computer/Local Disk (C) then left click on it to open each directory branch as seen below which represent the above file paths...

- 2) After all 4 items have been placed in their respective directories, **REBOOT MT4** (if it was running during installations)
- 3) **You must now Authorize CustomTimeAxis™ as per below before attaching CTA to any charts** (or they will throw an Error pop-up and abruptly shut down the chart it is being applied to (irritating yes, but security company says can't be changed)).

How to Authorize CTA

Note: Every type of security methodology has benefits and drawbacks. Because of the multiple MT4 platforms many traders use on their computers, in order to have the seamless, hassle free integration of CTA without always having to look up receipt #s and swap out account numbers while continually having to keep track of how many and which platforms are being used, whether Demo or Live accounts, etc. we decided to use something called CID (computer ID) authorization scheme. In this manner, once a computer is "authorized" with this method, CTA can be run on it in as many instances as desired without ever having to think twice about any of the above variables. And this can be done on up to 3 computers. And computers can be easily "swapped out" if the 3 machine limit is reached.

To Authorize a computer, simply do the following:

- 1] **Go to the Authorization interface page** at the following link by clicking or copying and pasting it into your browser <http://www.theabundancealliance.com/mt4timeaxis/authorize/authorize.php>
- 2] Locate the showmycid.exe file found in this same directory this manual you're now reading was found in and **Double Click** it.
- 3] **click the "Copy to Clipboard" button.**
- 4] On the page you went to in step 1 above, **RIGHT-click in the "Computer 1 ID" field** and select **"Paste"** from the pop-up menu that should appear. Perform steps for any 2 additional computers desired and **MAKE A NOTE OF WHICH CID IS FOR WHICH COMPUTER SO THEY CAN BE INPUTTED TO RETAIN AUTHORIZATION WHENEVER A NEW 3RD MACHINE IS DESIRED TO BE ADDED.**
- 4] Be sure to enter the information EXACTLY with not additional spaces before or after and Complete **the other fields** by typing in your

First Name
Last Name
PayPal eMail
PayPal Transaction ID **(NOT YOUR JVZoo receipt number.**
Please double check this to insure you have the 17 digit PayPal Transaction ID.) on the **PayPal receipt** (not the JVZoo receipt) you should have received after purchase
- 5] **Left click on the blue "Authorize" button** and wait for the "Success" page to appear (it can take up to a minute or so). Once the success page appears...

You are now ready to begin using Custom Time Axis!

FINAL HELPFUL POINTS TO NOTE...

- * **MAKE SURE YOU "Allow Dll Imports" and "Allow external experts Imports" boxes are checked** in the Common tab of the indicator or CTA won't show up when you apply it to a chart. Explained more in depth at: <http://www.mt4timeaxis.com/troubleshooting.html>
- * **Remember to read THE CTA Manual.pdf enclosed or online** at www.mt4timeaxis.com/ctavideomanual.html where you can also follow along with a video version of the manual to get the most out of CTA
- * **REMEMBER THERE IS ALSO AN ONLINE TROUBLESHOOTING GUIDE AT** to keep abreast of any past or current issues which may be of assistance to you @ <http://www.mt4timeaxis.com/troubleshooting.html>
- * **You can always email: support@mt4timeaxis.com** if you need additional assistance.

Thank You and ENJOY!
